

Subject Index – Vol. 56

A

Acetoxymethyl-methylnitrosamine 139
 Acute CO intoxication 106
 Acute toxicity 43, 151
 Adrenal medulla 113
 Adriamycin 151, 158
 Adverse effects 117
 Aflatoxins 12
 Ah locus 18, 219
 ALA synthetase 167
 Aldrin 12
 Amatoxins 190
 Aristolochic acid 158
 Aroclor 1254, 219
 Aromatic amines 1
 Arotinoid ethylsulphone 117
 Aryl hydrocarbon hydroxylase activity 226
 – inducibility 219, 230
 – responsiveness 226
 Arylhydroxylamines 96
 Ataxia 109
 ATP 175

B

Benz(a)pyrene metabolism 219
 – mutagenesis 219
 – recessive lethal mutations 219
 Beryllium 207
 Bias 215
 Biomonitoring 1
 Bone alteration 117

C

Cadmium 25, 128, 252
 Calcium 128, 272
 Carbon monoxide 106
 Carbon tetrachloride 78
 Carboxymyoglobin 106
 Carcinogenicity 69, 96
 Carcinogens 1
 Catalase 83
 Catecholamines 113
 Cell-mediated immune response 128
 Ceruloplasmin 25
 Chlorinated hydrocarbon 195
 Chlorpromazine 272
 Cholinesterase 201
 Chromosomes 283
 Citrinin 46
 Combined treatments 29
 Conduction velocity 205
 Copper 25
 Cutaneous perfusion 288
 Cytochrome P-450, 7, 167, 219

D

DNA alkylation 139
 Delayed neurotoxicity 136
 Di(2-ethylhexyl)phthalate 263
 Dibenz(a,c)anthracene 18
 – (a,h)anthracene 18
 Dichloroacetylene 74
 Dietary exposure 50
 Diethylmaleate 46
 Different response 92

Differential toxicity 132
 7,8-Dihydroxychlorpromazine 272
 Dimethylformamide 87
 Distal latency 205
 Dithiothreitol 272
 Dog 190
 Dorsal root ganglion 236
 Dose-response 215
 Drosophila 12, 158
 Drug-metabolizing enzyme 136
 Drugs 33

E

E. coli 267
 Efficient estimation 215
 Embryotoxicity 263
 Environmental 50
 Ethanol 170, 78
 Ethylenethiourea 92
 Eye irritation 43

F

Fenvalerate 283
 Ferrihemoglobinemia 96
 Foetal organs 252

G

Gamma-glutamyl transpeptidase 69
 Gastric ulcers 212
 Genetic and cytogenetic effects 66
 Genotoxicity tests 158
 Glutathione 46, 83

H

HCB 195
 Heavy metal salts 167
 Heme oxygenase 167
 Hemodialysis 182
 Hemoglobin 1
 Hemopexin 182, 190
 Hepatocytes 33
 Hepatotoxic effects 33
 2,5-Hexanedione 205
 Hexachloro-1,3-butadiene 46
 Human lymphoblastoid cells 230
 Hydrogen fluoride 50
 Hyperplasia 113
 Hypothalamus 279
 Hypothermia 279

I

Immunotoxicity 18
 In utero 283
 Indomethacin 212
 Inhalation 50
 Interaction 170
 Intoxication 50
 Iodoacetic acid 247
 Iron 25

J

Japanese quail 132

K

Kidney 252
 Kidney cortex 175

Subject Index – Vol. 56

A

Acetoxymethyl-methylnitrosamine 139
 Acute CO intoxication 106
 Acute toxicity 43, 151
 Adrenal medulla 113
 Adriamycin 151, 158

 Cutaneous perfusion 288
 Cytochrome P-450, 7, 167, 219

D

DNA alkylation 139
 Delayed neurotoxicity 136
 Di(2-ethylhexyl)phthalate 263
 Dibenz(a,c)anthracene 18
 – (a,h)anthracene 18
 Dichloroacetylene 74
 Dietary exposure 50
 Diethylmaleate 46
 Different response 92

Differential toxicity 132
 7,8-Dihydroxychlorpromazine 272
 Dimethylformamide 87
 Distal latency 205
 Dithiothreitol 272
 Dog 190
 Dorsal root ganglion 236
 Dose-response 215
 Drosophila 12, 158
 Drug-metabolizing enzyme 136
 Drugs 33

E

E. coli 267
 Efficient estimation 215
 Embryotoxicity 263
 Environmental 50
 Ethanol 170, 78
 Ethylenethiourea 92
 Eye irritation 43

F

Fenvalerate 283
 Ferrihemoglobinemia 96
 Foetal organs 252

G

Gamma-glutamyl transpeptidase 69
 Gastric ulcers 212
 Genetic and cytogenetic effects 66
 Genotoxicity tests 158
 Glutathione 46, 83

H

HCB 195
 Heavy metal salts 167
 Heme oxygenase 167
 Hemodialysis 182
 Hemoglobin 1
 Hemopexin 182, 190
 Hepatocytes 33
 Hepatotoxic effects 33
 2,5-Hexanedione 205
 Hexachloro-1,3-butadiene 46
 Human lymphoblastoid cells 230
 Hydrogen fluoride 50
 Hyperplasia 113
 Hypothalamus 279
 Hypothermia 279

I

Immunotoxicity 18
 In utero 283
 Indomethacin 212
 Inhalation 50
 Interaction 170
 Intoxication 50
 Iodoacetic acid 247
 Iron 25

J

Japanese quail 132

K

Kidney 252
 Kidney cortex 175

L

LD50 215
 Laser Doppler velocimetry 288
 Lead 175
 Lemon shark 55
 Lethality 170
 Limb bud culture 139
 Lipid peroxidation 83
 Liver 7, 252
 - enzymes 78
 Lung 59
 Lymphocyte 207, 128

M

Malachite green 43
 Manganese 29
 Maximum likelihood 215
 Mercury 242
 Metabolism 87, 7
 Metallothionein 25, 242, 247, 252
 Methylmercury 132, 236
 Methylcholanthrene 18
 Microsome 7
 - test 267
 Miosis 201
 Mixed function oxidases 167
 Monkey 128
 Mono(2-ethylhexyl)phthalate 263
 Monooxygenases 92
 Mouse 18, 92, 226, 263, 283
 Mutagenicity 43, 158, 267

N

N-Hydroxymethyl-N-methylformamide 87
 N-Methylformamide 87
 N-hydroxy-N-arylamides 96
 N-nitrosodiethylamine 69
 Na and K transport 175
 beta-Naphthoflavone 219
 Nephrotoxicity 46, 96
 Neuronal necrosis 109
 Nicotine 113
 Nitrosodimethylamine 7

O

O₂ consumption 175
 Oral cadmium 256
 Organophosphates 201
 Organophosphorus compound 136
 - insecticides 66

P

PCB 195
 Paraoxon 267
 Pardachirus flat fish 55
 Peripheral neuropathy 205
 Pesticide 195
 Pharmacokinetics 182
 Phenobarbital 69, 219
 Piroxicam 121
 Placenta 195, 252
 Polychlorinated dibenzofurans (PCDFs) 226, 230
 Polycyclic hydrocarbons 18
 Proliferation 207
 Propoxyphene 170

R

Radiation ionizing 29

Rat 109, 59, 87, 117, 132, 167, 205, 212, 236, 242,
 252, 256, 279, 92
 - tissues 247
 Recombinogenicity 158
 Renal mitochondria 175
 Retinoids 117
 Risk evaluation 1
 RNA synthesis 236

S

Saccharin 283
 Salmonella typhimurium 267
 Sarin 201
 Selenium 252
 Sensitization 43
 Sex differences 83
 Shark repellents 55
 Side-preference 139
 Solvent intoxication 74
 Stereology 113
 Strain differences 18
 Subchronic treatments 66
 Superior cervical ganglion 272
 Superoxide dismutase 83
 Surfactants 55
 Synchronized mammalian cells 29
 Synthetic pyrethroids 288

T

Tail nerve 205
 Teratogen 139
 Teratogenesis 283
 Teratogenicity 263
 Testes 12
 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) 226, 230
 Therapeutic doses 212
 - effects 205
 Thermogenesis 279
 Tissue CO content 106
 - specific effects 151
 Toxicity 87, 230
 Toxicokinetics 132, 190
 Trans-4-dimethylaminostilbene 151
 Transfer 195
 Trialkylphosphorothioates 59
 2,4,5-Tribromoimidazole 109
 Tributyl phosphorotrithioate 279
 Trichloroethylene 69, 74

U

Ulcer index 212
 Ultrastructure 59
 Uncoupling of oxidative phosphorylation 109

V

Valepotriates 267
 Vision 201
 Vitamin B12 205
 - B6 205
 - E 83

X

Xenobiotics 12

Z

Zinc status 247
 Zn, Cu, Fe content 256
